myenergi app

Remotely Control and Monitor your Devices

The myenergi app allows you to remotely control and monitor your myenergi device(s) from anywhere in the world. From changing your zappi's charging mode to having full visibility of your property's consumption, generation and diverted energy in real-time.

myenergi App Features

- Free to download on Google Play and Apple App Store

- Check libbi State of Charge (SoC)

- Change your zappi charging mode

- Pre-set when your eddi diverts surplus energy

- Share access to your account with friends and family

- Prioritise where your surplus local generation diverts to first (i.e. eddi, zappi or libbi)

- Set schedules for your devices to optimise your energy tariff

- Choose whether you want to charge libbi from solar, grid or a mixture of both

- Decide how 'green' you want to be by adjusting your zappi's 'minimum green charge level'

- View your live energy flow in real time

- Have visibility of consumption, generation and diverted energy data

- Remotely 'boost' your eddi or zappi

- Create an account using your social media login

- View device performance history using our intuitive graphs

- Monitor imported and exported energy for your libbi

- Input your electricity tariff so libbi can optimise charging around your time of use or dynamic tariff
